#### **DETAILED ACTION**

### Claim Objections

- 1. The final of rejection imposed in Paper #11 is withdrawn by the examiner.
- 2. Applicant is advised that should claim 9 be found allowable, claims 8 and 14 will be objected to under 37 CFR 1.75 as being a substantial duplicates thereof. When two or more claims in an application are duplicates or else are so close in content that they all cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the others as being a substantial duplicates of the allowed claim. See MPEP § 706.03(k). The intended use does not differentiate one claim from another.

# Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 7, 13 and 17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claim 7 is a hybrid claim. One of ordinary skill in the art would not be able to ascertain whether said claim is directed to an additive composition or a cementitious composition. Claims 13 and 17 depend from claim 7.
